A PHENOMENAL ACHIEVEMENT OF AN AMERICAN INDU TOY The officer in charge of the Brewery's

Revenue Department, upon expressing his New Year's congratulations to Mr. Adolphus Busch, president of the Anheuser-Busch Brewing Association, submitted to him a carefully compiled statement of the brewery's last year's output, showing the enormous sales of 1,006,495 barrels of beer, which netted the Government an Income of \$1,501,818.

Considering that in the birthplace of King Gambrinus, Austria and Bavaria, there are breweries that have been in existence for centuries and some, even in this country, which have been established more than a hundred years, whose output does not reach one-half of the above ligure, the achievement is most remarkable especially so since this record was made in less than 35 years and under the sole and continuous management of its present president.

Maddrey, a well known Norfolk man, informing him that from her home in Norfolk and that suspected she was in the vicinity of Old Point. iny temptations."

The husband informs the Mayor that she has "a warm friend, named D. Partin, a sailor on the United States ship Illinois," expected in Hampton Roads. He believes she is in this neighborhood waiting for the vessel and asks the Mayor to have a watch kept and to arrest and hold her if found.

The Consumers' Light, Heat and ice Company has offered to sell its plant, franchises, contracts and equipment to the city for \$95,318.13, which represents the actual cost of the business to the com-pany. The company owes \$87.318.13 to the contractors, who are seeking to secure a receiver, failure to pay the contractors being due, it is claimed, to inability to float bonds notwithstanding the fact that the company is earning over 6 per cent. on its capital. The failure to float bonds is ascribed to antagonistic influence of rivals. It is impossible to state what action the city will take, but in view of present five-year lighting contracts, it is not thought that the proposition can be accepted.
